Customer Reviews

The two authors are law professors at UCLA, and their talent for weaving essential content into mnemonic, entertaining bites shines in this book. I'm not personally familiar with the law faculty at UCLA, but most likely they don't retain the ignorant and misinformed, in turn implying that these folks must know what they are writing about. General ideas are followed by nutshell examples that fix the concept in mind in a way easily remembered. Names in the examples are simply charming. For example, there is Jerry Atric and a wrongfully discharged employee named Mal Treeted. We

also hear the brief story of a software contractor named Evan Elpus suing Mackrosoft and deposing vice president Jenny Daynow and the President, Noah Way. Stupid, yes, and also funny. I'm mostly interested in the single chapter specifically for expert witnesses, easily worth the price of the entire book for me. For example, the tip about preparation for a deposition cautions about what documents to review and not review. Anything you review to refresh your recollection is discoverable.

Documents otherwise not available to the other side may thus become available if you carelessly refer to them in preparation for a deposition. Small detail, but potentially vital. Generally, any documents in your file you bring to a deposition are subject to discovery and the other attorney is apt to have copies made of the entire file. Other advice is to keep a chronological file so you can keep dates and times easily reportable. There are many more nuggets for expert witnesses, although this is only one chapter.
